

# Dairy Cattle Receiving Information

## WESTERN DAIRY SHOWCASE 2025

1. Enter through the Livestock Gate (Gate 13), turn right at “Livestock parking field” Field,
2. You will be met by a veterinarian and dairy biosecurity manager, where they will need all of your paper work. (negative test and RFID documentation of premise) Once cattle have been inspected, temperature taken and cleared by the vet they will be walked to barn 9 and barn 10. They will walk through a foot bath in front of each barn.
3. The vehicle and trailer tires will be sprayed down and then will exit through the Front Gate (Gate 1).
4. All health suspect dairy cattle will be quarantined to the left in c10 paddock. If the veterinarian determines a dairy animal should be removed from the grounds, the animal **MUST** be removed immediately. Veterinarian decisions are final.

Please follow the red arrows.
